OLORUM

Um transe transcendental e onírico no átimo-conexão onde só há verdade e entrega. Não trata do registro apenas e sim do êxtase conjunto, confundindo o observador e observado, num movimento em camadas de universos e territórios visuais, o punctum antropológico de ver-se no outro; o descobrir-se nesta certeza do ato único de sentir. Respirar apenas, olhar pelos poros e destruir a imagem em cascas antropofágicas atemporais e simbólicas. Para fotografar êxtases é preciso ser o próprio êxtase e vibrar na mesma frequência do outro, simbiose completa. Alceu Bett faz jus a sua produção cinematográfica singular neste ensaio visual- etnográfico de grande poder estético quase religioso; paradoxalmente entre cinema e fotografia.
